

## **Annex A: products covered by measures which did not meet the criteria for being maintained**

The 72 measures which did not meet the Government's criteria for maintaining measures covered the following products. Please note that in several cases, there is more than one measure on a product, which is why 72 measures cover only 48 products.

Our records show no UK producers involved in these cases at the EU level, and in several cases we received responses which stated that there was no UK production of certain products. However given the potentially serious impact of not maintaining a measure where there was sufficient UK production, we are using a number of channels to try to tell hard-to-reach companies about this process.

1. Acesulfame potassium
2. Aluminium Foil
3. Aluminium foil in large rolls
4. Aluminium foil in small rolls
5. Aluminium radiators
6. Aspartame (sweetener)
7. Barium Carbonate
8. Citric acid
9. Citrus fruits
10. Coated fine paper
11. Electric bicycles
12. Ferro Silicon
13. Graphite electrode systems
14. Hand pallet trucks & their essential parts
15. High tenacity polyester yarns
16. Lever Arch Mechanisms
17. Lightweight thermal paper (65gr/m<sup>2</sup> or less)
18. Low carbon ferro-chrome
19. Manganese dioxide
20. Melamine
21. Molybdenum wires
22. Monosodium glutamate

23. Monosodium glutamate
24. Okoume plywood
25. Open mesh glass fibre fabrics
26. Oxalic Acid
27. Peroxosulphates
28. Ring binder mechanisms
29. Seamless pipes and tubes (large 406.4mm)
30. Seamless pipes and tubes of iron or steel
31. Silicon metal
32. Sodium cyclamate
33. Sodium gluconate
34. Solar glass
35. Solar panels
36. Stainless steel cold rolled flat products
37. Stainless steel tubes and pipe butt welding fittings
38. Stainless steel wires
39. Steel (wire) ropes and cables
40. Sulphanilic acid
41. Sweetcorn
42. Tartaric acid
43. Threaded tube and pipe cast fittings of malleable cast iron
44. Trichloroisocyanuric acid
45. Tube and pipe fittings of iron or steel
46. Tubes and pipes of ductile cast iron
47. Tungsten Carbide
48. Tungsten Electrodes
